WI-FI POLICY for AAU students

AAU students may connect their personal laptops to the AAU wireless network. Wi-Fi covers the main building at Lázeňská 4, Lázeňská 2, the Computer Lab, and the Library.

The Wi-Fi permission is valid only for registered students of the semester (renewable each term). A student can connect only one device at once. The Wi-Fi access is activated automatically, as the student is registered and the login with the password is created.

Registered students can use their Computer Laboratory login and password to access Internet using any of AAUNI wireless APs (Access Points). Those can be identified by name, which includes AAUNI or AAVS substring. Please prefer strongest signal AP, or AP designated for a classroom you are currently in (classroom number is substring of the AP SSID - AP name). Wi-Fi password is unchangeable. Connection speed can be limited if needed.

All AAUNI public facilities should be covered by Wi-Fi signal, mainly classrooms and corridors. Supported connection ciphering is WPA-PSK and WPA2-PSK.

AAUNI has a lot of independent access points. You will have to create Wi-Fi profile when connecting 1st time for each of them one by one (if you intend to use them of course).

Be aware of the fact that only AAU students are allowed to use the AAU wireless network.

Mandatory settings of operating system:

1. Updated operating system
2. Enabled firewall (installed and switched on)
3. Updated antivirus solution

The procedure for connecting to the AAU Wi-Fi is as follows:

1. Your laptop must be equipped with a wireless fidelity card
2. Select AP (Access Point) with the best signal. APs are named by their locations (naming rules are described before)
3. Select cipher/code WPA-PSK or WPA2-PSK (pre-shared key)
4. Enter password AaVs.4.wlfl2 (capital "a", "v", "i", and "i")
5. Open any webpage (such as www.google.com)
6. Fill the window in with login and password you use in the Computer Lab (in the format first_name.surname and your password). Keep in mind that the account is disabled at the end of every semester and reactivation is done when registered for another one.

Downloading / sharing / exchanging of illegal data using AAU facilities is strongly forbidden!

**Violation of this AAU policy
may result in the loss of Wi-Fi internet access!**
